EPIC
SOLUTION
Interior Designs

EPIC SOLUTION

EPIC Solution is an interior wall panel clipping system and process that simplifies the struggles field personnel commonly face during cab interior installation. It was designed to make installation much faster by reducing or eliminating steps previously required.

EPIC's wall panel clipping system & process feature self-locating vertical mounting strips (with integral mounting hardware) and will typically require the field installer to use a tape measure 1-time during the installation.

KEY FEATURES & BENEFITS:

- ▶ **Unlimited Panel Design Configurations:**
Other "fast-install" systems are limited to horizontal panel designs only.
- ▶ **Full Depth Reveals:**
For a more distinguished aesthetic & higher quality design, EPIC utilizes full depth reveals as panel separation devices instead of black-painted, routed quirks.
- ▶ **Ships Complete:**
Full depth side wall & corner reveals, wall panels (ready with pre-fixed mounting hardware attached), screws, nut driver, spacing block, panel hanging/positioning device, adhesive & marking utensil.
- ▶ **An Option for Weight-Sensitive Modernizations:**
Light-weight panel and component options are available with EPIC.

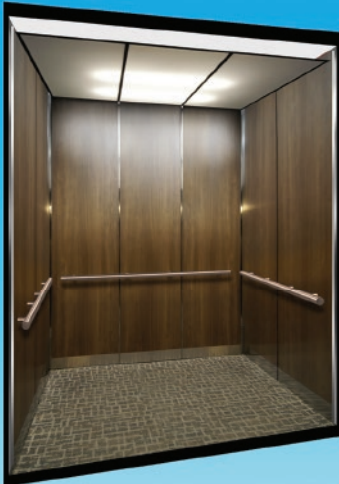

U.S. Patent No. 9156658, D743057, D748824

Technical support:
1.877.603.5352
before, during & after
installation.

See the Demo on our website:
GandRCustomCabs.com/EPIC-Solution

EPIC SOLUTION
A NEW EXPERIENCE IN CAB INTERIOR INSTALLATION
offering complete vertical & horizontal placement versatility
like no other "fast install" system

SHOWN WITH:

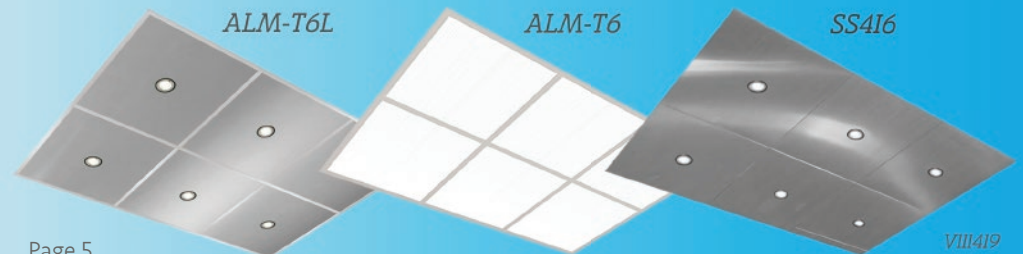

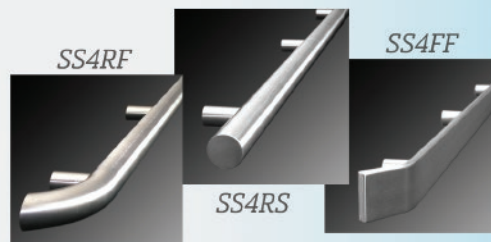

- ▶ *Wall panels: Vertical wall panels faced with standard selection plastic laminate (Wilsonart 7992-38 "Pinnacle Walnut" selection shown)*
- ▶ *Panel edging: stainless steel #4 trim on vertical edges of wall panels*
- ▶ *Panel base: 4" high stainless steel #4 integral base trim at bottom of each panel*
- ▶ *Handrail: 1-1/2" round stainless steel #4 bar with straight ends*
- ▶ *Ceiling: stainless steel #4 island with LED downlighting*
- ▶ *Reveals: Stainless steel #4*

PANEL EDGE TRIM
Stainless steel trim on the vertical edges of the wall panels provides superior protection from edge damage

SHOWN WITH:

- ▶ Wall panels: horizontal wall panels faced & edged with plastic laminate (Wilsonart 1868K "Aged Piazza" and 1819K "Bella Venito" shown)
- ▶ Stainless steel on the horizontal edges between the panels
- ▶ Lower panels have integral 4" stainless steel base
- ▶ Handrails: 3/8" x 2" flat stainless steel #4 (SS4FS)
- ▶ Ceiling: aluminum T-frame with translucent diffusers (ALM-T3)
- ▶ Reveals: stainless steel #4

STAINLESS STEEL #4 SATIN

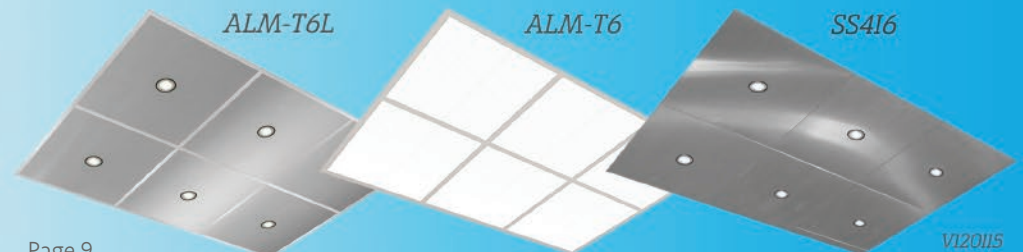

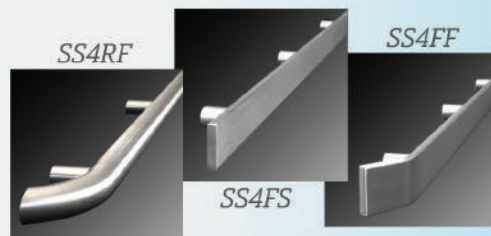

#4 finish stainless, commonly referred to as "satin" finish, is a bright polish that is the most popular choice for architectural applications.

HANDRAILS

3/8" x 2" stainless steel #4 satin finish bar with straight ends
Also available in 3", 4", 6" & 8"

Other styles of
handrails & ceilings
are available

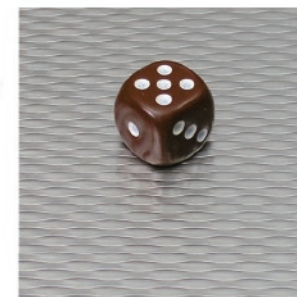

SHOWN WITH:

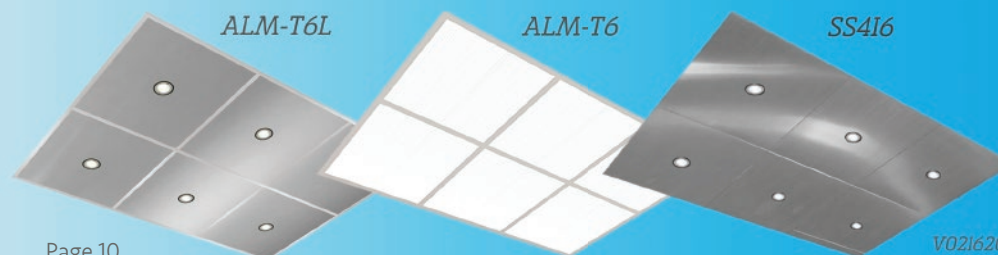

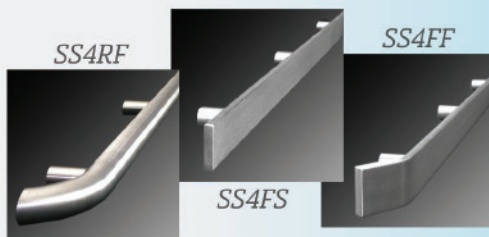

- ▶ Upper wall panels: horizontal panels faced with standard selection plastic laminate & edged with stainless steel #4 trim (Wilsonart 7924K-07 "Biltmore Cherry" plastic laminate shown)
- ▶ Lower panels: horizontal panels faced & edged with SWL pattern stainless steel
- ▶ Handrail: 1-1/2" round stainless steel #4 (SS4RS)
- ▶ Ceiling: Lightweight stainless steel #4 suspended island with LED downlights (SS4I6LW)
- ▶ Reveals: stainless steel #4

RIGIDIZED SWL PATTERN STAINLESS STEEL

The woven fabric look of the embossed surface of this stainless steel softens glare, hides scratches, and reduces friction.

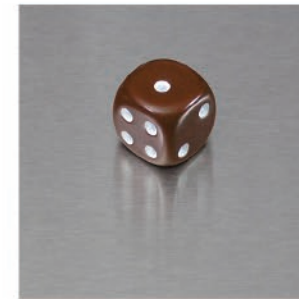

Other styles of
handrails & ceilings
are available

SHOWN WITH:

- Wall panels: horizontal wall panels faced & edged with plastic laminate (Wilsonart 7964K "Skyline Walnut" and 4944-38 "Casual Linen" shown)
- Stainless steel on the horizontal edges between panels
- Lower panels have integral 6" stainless steel handrail trim and 4" stainless steel base
- Handrails: 1-1/2" round stainless steel #4 (SS4RS)
- Ceiling: stainless steel #4 island with LED lighting (SS4I6)
- Reveals: stainless steel #4

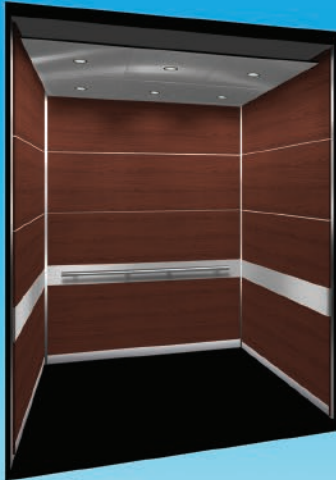

STAINLESS STEEL #4 SATIN
#4 finish stainless, commonly referred to as "satin" finish, is a bright polish that is the most popular choice for architectural applications.

Handrails & Bumper rails

SS4RS
1-1/2" round stainless steel #4
satin finish tube with capped ends

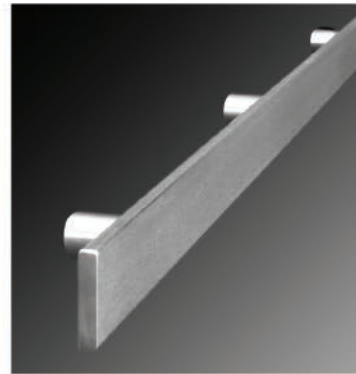

SS4RF
1-1/2" round stainless steel #4
satin finish tube with returned ends

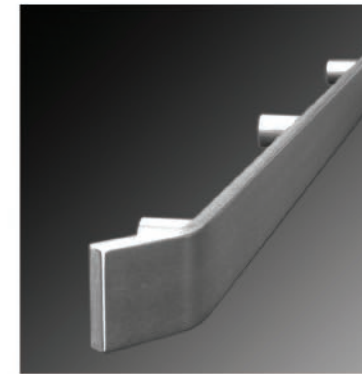

SS4OS
Oval stainless steel #4 satin finish
tube with capped ends

AVAILABLE FINISHES

- ▶ *Stainless steel #4 satin finish*
- ▶ *Stainless steel #8 mirror finish*
- ▶ *Bronze #4 satin finish*
- ▶ *Bronze #8 mirror finish*
- ▶ *Medium & dark oxidized bronze*

SS4FS
3/8" x 2" stainless steel #4 satin
finish bar with straight ends
Also available in 3", 4", 6" & 8"

SS4FF
3/8" x 2" stainless steel #4 satin
finish bar with returned ends
Also available in 3", 4", 6" & 8"

Ceilings

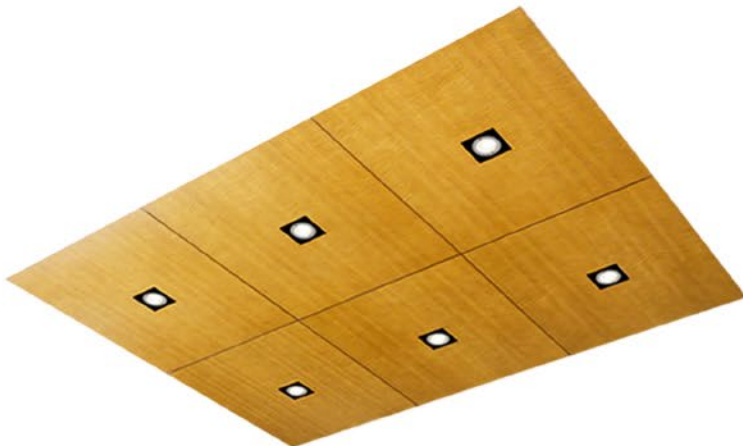

SS4I6

Stainless steel #4 satin. Shown with round LED downlights
(Fluorescent, halogen & incandescent downlights also available)

B4I6

Bronze #4 satin. Shown with round halogen downlights
(LED, fluorescent & incandescent downlights also available)

WVI6

Wood veneer. Shown with square LED downlights
(Halogen downlights also available)

SS4I6M

Stainless steel #4 satin. Shown with round Mini-LED downlights
(Fluorescent, halogen & incandescent downlights also avail)

ALM-T3

3-panel aluminum T-frame with twin-wall translucent diffusers
Fluorescent lighting above (LED lighting also available)

ALM-T3E

3-panel aluminum T-frame with 1/2" aluminum eggcrate diffusers
Fluorescent lighting above (LED lighting also available)

ALM-T6

6-panel aluminum T-frame with twin-wall translucent diffusers
Fluorescent lighting above (LED lighting also available)

ALM-T6E

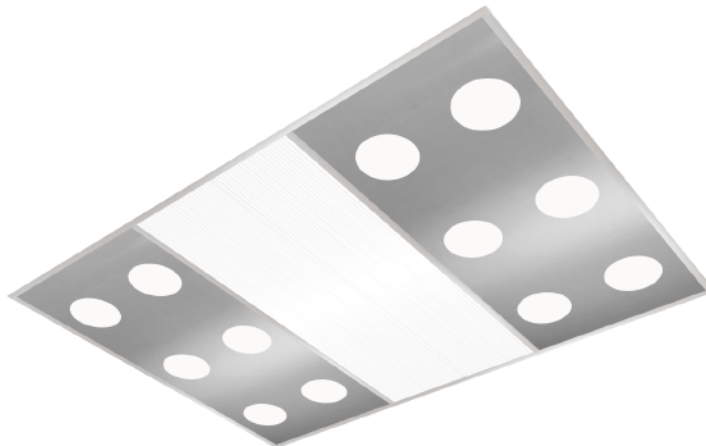

6-panel aluminum T-frame with 1/2" aluminum eggcrate diffusers
Fluorescent lighting above (LED lighting also available)

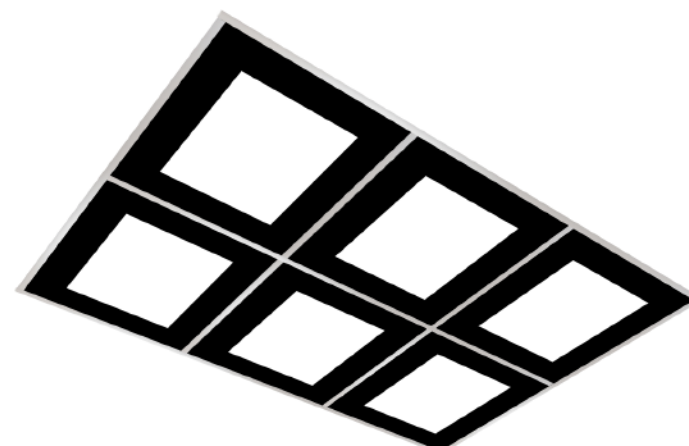

SS4-T6L
Stainless steel T-frame with stainless steel #4 lay-in panels
and round LED downlights
(Fluorescent, halogen & incandescent downlights also available)

ALM-T6L
Aluminum T-frame with stainless steel #4 lay-in panels
and round LED downlights
(Fluorescent, halogen & incandescent downlights also available)

ALM-T3RC
Aluminum T-frame with translucent diffusers and
stainless steel with round cutouts
Fluorescent lighting above (LED lighting also available)

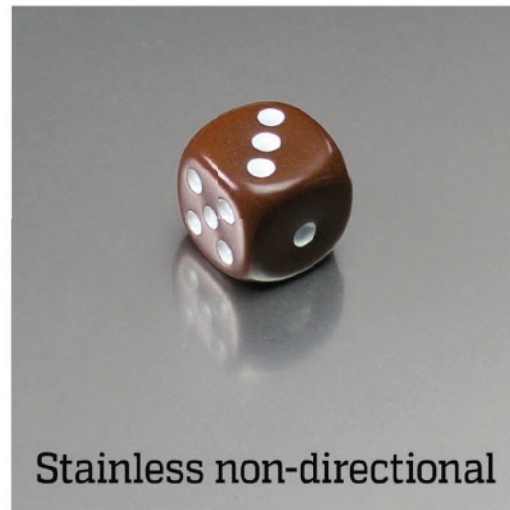

ALM-T6SC
Aluminum T-frame with translucent diffusers and
black bordered square cutouts
Fluorescent lighting above (LED lighting also available)

WHY US?

When we promise, we deliver.

You can rely on us to have consistent manufacturing lead times and on-time shipping. We're aware that this kind of work must be scheduled well in advance.

We understand how to work with people:

Our approach is focused on working collaboratively, honestly and quickly.

We know structure & equipment—

saving clients time & money: Since we've been around for so long, we know how things "fit and work together" and can quickly develop solutions for cab projects and components that meet our clients needs, timing and budget.

World Class Support: Our clients know that we're here for them—we have their back and they count on us for support when they need it.

Proven in the Field: Our staff work hard to deliver attentive service and finely crafted products to our clients—because we care.

Since 1978 we've produced high-quality products—meeting our clients expectations in performance and durability.

We make the entire project process easier because everyone in sales, engineering and production work as a team to eliminate code, design, fabrication, and installation problems before manufacturing begins. What can you expect from us?

 **Professional Service**

 **Technical Expertise**

 **Unmatched Craftsmanship**

 **Innovative Solutions**

Get in touch with our Sales team to learn more, we'd love for you to let us build you the right product, on time.
